

DEBRIS REMOVAL SYSTEM

The world's best high capacity main drain

The MDX Debris Removal System™ is designed to exceed the industry standard ASME/ANSI anti-entrapment requirements, and is tested and listed by IAPMO, to earn the premier Swimming Pool Spa and Hot Tub Code (USPC) shield. MDX also offers multiple layers of protection, including the SDX High Flow Safety Drain™. If the MDX becomes covered, the SDX activates to prevent excessive suction and truly becomes a safety backup. In addition, proper installation includes a third point of suction relief located between MDX and the filtration pump to provide even further protection.

The MDX Debris Removal System™ combines quality, craftsmanship, and innovation to provide you with the best for your pool. MDX is more than just a drain; when combined with a Paramount in-floor cleaning and circulation system, the MDX Debris Removal System™ is a highly efficient drain that allows dirt, leaves, and other debris to be effectively removed from your pool.

For more information, call Paramount Pool & Spa Systems at 1.800.621.5886 or contact your local sales representative.

FEATURES AND BENEFITS

For concrete, vinyl, and one-piece pools

Unique funnel-shaped design compresses and directs debris to the outlet port for quicker, more powerful removal with less likelihood of blockage

Large debris, including large leaves and rocks up to 3/4", passes efficiently through MDX for easy removal outside the pool

Approved installation includes the SDX High Flow Safety Drain™ (or another listed second point of suction) and a third point of suction relief to provide further protection from suction entrapment

Outstanding for spas, overflow basins, and fountains, anywhere debris needs to be removed and anti-entrapment protection is required

Available in eight colors to blend with the surface of any pool

White Gray Black Taupe Blue Light Blue Beige Light Gray
